EXPERIENCE

Veer AI   May '20 - Sept '20
Lead UX Engineer // veer.ai

- **Designed high-fidelity prototypes** with Figma, and then developed those into an HTML, CSS/Sass, and JS (React) component library
- **Developed the corporate website** from wireframes to production using HTML, CSS/Sass, and JS, focusing on responsive design and maintainability
- **Created the brand design system**, including logos and typography, colour, and accessibility guidelines
- **Led design sessions** on new product features for back-end engineers, business analysts, and management

Ceridian Dayforce   May '19 - Dec '19
Mobile QA Engineer

- **Built new Recruiting and Directory features and addressed client reported bugs** in collaboration with developers, business analysts, and UI/UX designers
- **Increased cross-platform accessibility testing coverage by 35%**, following Web Content Accessibility Guidelines (WCAG) 2.0 criteria
- Analyzed product requirements to develop and automate unit, regression, UI, and performance mobile testing plans in Cucumber

PROJECTS

Portfolio Website   Dec '18 - Sept '20
Web Developer & Designer // tanzimpathan.github.io

- **Developed a personal portfolio website** using HTML, CSS, and JS
- Used media queries to ensure responsive design across all platforms
- Designed animated elements and backgrounds with Procreate, Photoshop, and Illustrator

Motiv App   Feb '19
UI/UX Designer // github.com/tanzimpathan/motiv

- **Designed, prototyped, and pitched a mobile app** to connect young professionals to networking events in their vicinity at ElleHacks @ YorkU
- Created a cohesive brand UI style guide and designed all elements in Adobe Photoshop to adhere to it
- Developed product flows, wireframes, and an interactive prototype with FramerX
- Conducted extensive UX research and usability testing throughout the entire development of the app
